

Phase-5: Platform Configuration & Development Guide

Project: Auto Ticket Classification using Flow Designer | Target: u_incident_workflow | Scope: Global

5.1 Step-by-Step Implementation Procedure

Activity 1: Update Set Creation & Active Context

1. Navigate to **All** → **System Update Sets** → **Local Update Sets**.
2. Click **New**. Enter Name: Project Update Set, Application: Global, State: In progress.
3. Under Related Links, click **Make This My Current Set** to ensure all subsequent configuration records are captured.

Activity 2: Custom Table & Column Architecture

1. Navigate to **System Definition** → **Tables** → Click **New**.
2. Label: Incident Workflow, Name: u_incident_workflow. Uncheck *Create module*.
3. Under **Controls**, check **Auto-number** = true. Prefix = INC, Number = 1000, Number of digits = 7.
4. Generate default user role u_incident_workflow_user with standard CRUD access rules.
5. Open **Form Designer** and arrange a balanced 2-column layout:
 - *Left Column*: Number, Caller, Category, Subcategory, Short Description, Description.
 - *Right Column*: State, Assigned Group, Assigned to.

Activity 3: Configuring Dictionary Dependency

1. Open the Dictionary Entry for field u_choice_3 (Subcategory) in **Advanced View**.
2. Under the **Dependent Field** tab, check **Use dependent field** = true and set **Dependent on field** = u_choice_2 (Category).
3. In the **Choices** related list, populate:
 - Wi-Fi → Dependent Value: network
 - Projector → Dependent Value: hardware
 - Forgot Password → Dependent Value: access
 - Slow Computer → Dependent Value: performance

Activity 4: Flow Designer Automation Engine

1. Navigate to **Process Automation** → **Flow Designer**. Click **New Flow**.
2. Name: Auto Classify School IT Tickets, Application: Global, Run As: User who initiates session.
3. **Trigger**: Created on table u_incident_workflow WHERE Category is Empty.

4. Logic & Actions:

- *If*: Short Description contains Wi-Fi OR contains Network → Update Record (Category: Network, Subcategory: Wi-Fi).
- *Else If*: Short Description contains Projector → Update Record (Category: Hardware, Subcategory: Projector).
- *Else If*: Short Description contains Forgot password → Update Record (Category: Access, Subcategory: Forgot Password).
- *Else If*: Short Description contains Slow computer → Update Record (Category: Performance, Subcategory: Slow Computer).
- *Send Email Action*: To: Trigger → Caller → Email, Subject: Your Request for the issue has been submitted.

5. Click **Save** and select **Activate**.
